

How to avoid the basic problem of getting hacked over pirater-un-compte-FB?

Facebook connects people all around the world. No matter where you are, you can connect to anyone where ever they are through this amazing social networking site. But, have you ever wondered what happens when your Facebook account gets hacked?

Things you need to know before joining Facebook

Facebook connects you to people but there are times when your Facebook account might get hacked. But, what to do when your account gets hacked?

There are certain things you need to know before you joining Facebook to avoid the basic problem of hacking. These things include the following:

1. Facebook has a secret access to all your contents that you share over Facebook. Starting from your pictures to your IP address Facebook keeps a track of everything. The reason being Facebook is free. To avoid any kind of hacking the best is to avoid connecting in public.
2. Facebook has this ability to save everything. All the different sites that you visit or the products that you like, Facebook keeps a track of it all. Enabled 'cookies' is essential for Facebook to run smoothly without any worries of hacking.
3. Even when you think of hacking a Facebook account for any fun purposes or small pranks, give it a thought again. Facebook has a record of every small activity that you perform on the site. According to <http://pirater-un-compte-fb.com/> people have been killed for small wrong step they took related to hacking.
4. People confuse Facebook with a platform to earn fame, but, rather a Facebook is a place to connect to people that you know personally. A section 'people you may know' just suggests you the people you might add. Do not go on adding everyone to avoid hacking. Also, don't just respond to every request that you come across.
5. There are certain privacy settings that are provided to you by Facebook to avoid any kind of hackings. You can choose the people who can see your pictures. You can limit the audience from viewing what you share. This definitely helps in limiting any unwanted views over your profile.

These are some of the things that you should consider before getting back or getting first time over Facebook. A small care can help you from not falling into that complex situation of being hacked.

So, connect to people but connect safely.
